Copilot Quick Start for HR

A proposal for The Haverford Trust Company

Prepared for:
Erin Hughes, Ph.D., Vice President, Human Resources

Prepared by:
Caroline Hinton, Founder, Growth Partner Pros

Date:
[November 9, 2026]

What I heard

You have Microsoft 365 Copilot, a handful of HR tasks that take more time than they should, and not much IT help to lean on. You've already started using Copilot on your own, which is the hardest part. What you want now is someone to work through the real tasks with you so you can do them confidently on your own afterward.

[Add one or two specifics from today's call here, in Erin's own words if you can.]

What we'd do together

Four working sessions over four to six weeks, on Zoom, with your screen shared. We work on your actual tasks, not demo examples. You leave each session with something that works and a short written recap with the exact prompts and steps, so you can repeat it without me.

Session 1: 360 feedback summaries

We build a reusable Copilot workflow that turns your Microsoft Forms results into clear rating and comment summaries. We'll also talk through how to keep employee data inside your Microsoft 365 environment.

Session 2: Job description template

We set up a Word template where the sections you want consistent are locked, and the sections managers own stay open to edit. Then we use Copilot to help managers draft their parts faster.

Session 3: Interview scheduling and team tracking

We set up a simpler, repeatable way to schedule interviews with several internal people and an outside candidate. We'll also set up Planner so you can see what your team is working on at a glance.

Session 4: SharePoint plan

We sketch the folder structure and permissions for your HR documents in SharePoint, so the move is easy to follow when you're ready. Having your files in SharePoint also helps Copilot give you better answers, because Copilot can search what's stored there.

Between sessions, you can email me quick questions and I'll answer within two business days.

Investment

RECOMMENDED

Copilot Quick Start for HR

$5,000

Fixed fee. All four sessions, the recaps, the 360 workflow, the job description template and email questions between sessions.

TO START SMALLER

360 Starter

$1,500

One working session, the finished 360 workflow and a written recap. If you move into the full package within 30 days, the $1,500 counts toward the $5,000.

Payment:
[Invoiced when we schedule the first session, due within 15 days.]

What's not included

Moving the HR documents into SharePoint is a separate project. It usually takes longer than anyone expects, and it deserves its own plan and price. Once we've done the plan in Session 4, I'm happy to quote it if you'd like help with the move.

A note on your data

You don't need to share real employee data with me to get started. We can build everything with sample or blank versions and then you run it on the real files. Before Session 1, it would help to know whether Haverford Trust has guidelines on what can go into Copilot, so we stay inside them.

Next step

If this looks right, just reply and let me know which option you'd like. I'll send a few times for our first session. We can start as soon as [the week of November 16].

This proposal is good for 30 days.

Looking forward to it,

Caroline
